»Just expect MORE!« is the Esselmann formula for your success. MORE innovation, MORE design and MORE performance at the most favourable possible price all go to make Esselmann mobile bars into a profitable investment.

The models BP18, BP23 and BP24 with cold room are the perfect choice for all those who have MORE to offer.

The cold room can accommodate up to 22 barrels of beer and offer MORE than enough space to pre-cool your entire range of drinks. An unbeatable advantage at major events.

The cold room can conveniently be restocked through the front panel. The beer is actually cooled on board the mobile bar, and the draft beer is piped directly from the cold room: saving time and energy.

The solid hot galvanised frame construction in conjunction with the optional AL-Floor guarantees reliability and durability. The patented Esselmann folding system simplifies handling and minimises the time spent in setting up and packing away.

Generously dimensioned advertising surfaces on the cold room, the roof placard, the logos on the counter fronts and exterior surfaces and the customised paintwork in company colours ensure that your brand is given the best possible showcase.

You will be convinced by the enormous range over which the **Esselmann panoramic glass roof** makes an impact at night. During the day, the light-flooded interior creates a friendly atmosphere.
